

Valluru Sajjad Hyder

DevOps Engineer | Cloud Infrastructure Specialist

Hyderabad, TS | +91-8919702040 | devops135790@gmail.com | linkedin.com/in/sajjad-hyder-90126a88

PROFESSIONAL SUMMARY

Experienced DevOps Engineer with 8+ years in IT and 4+ years specializing in Azure cloud infrastructure, CI/CD automation, and containerized application platforms. Proven expertise in designing, deploying, and managing highly available, secure, and cost-optimized cloud infrastructure supporting production workloads with 99.95% uptime SLA. Strong hands-on experience with Kubernetes, Docker, Terraform, Azure DevOps, and modern DevOps toolchains. Track record of reducing infrastructure costs by 25-35% and incident response times (MTTR) by ~50% through automation and proactive monitoring.

CORE SKILLS

Cloud Platforms: Azure (Proficient), AWS (Basic) | 4+ years

DevOps & CI/CD: Azure DevOps, GitHub, GitHub Actions, Jenkins, Maven, GitLab CI, Docker, Kubernetes, Helm, Container Orchestration | 4+ years

Infrastructure as Code (IaC): Terraform, Azure CloudFormation, ARM Templates, Ansible | 2+ years

Containerization: Docker, Kubernetes (AKS), Docker Compose, Azure Container Registry (ACR), Image Optimization | 4+ years

Monitoring & Logging: Grafana, Prometheus, ELK Stack, Azure Monitor, Application Insights, Alerting | 2+ years

Operating Systems & Scripting: Linux (Ubuntu, Amazon Linux), Bash, PowerShell, Python, Shell Scripting | 4+ years

Azure Services: AKS, App Services, Azure DevOps, Azure Storage, Virtual Machines, Load Balancers, VNets, Key Vault, Azure Monitor | 4+ years

Expertise: Production Support, Incident Management, Root Cause Analysis (RCA), SLA Management, Cost Optimization, Security Hardening, Zero-Downtime Deployments, Auto-Scaling, Disaster Recovery

PROFESSIONAL EXPERIENCE

Azure DevOps Engineer

Otis Global Services Pvt Ltd, Hyderabad | March 2023 – Present

- Lead end-to-end Azure cloud infrastructure ownership for 4+ business-critical production platforms serving thousands of daily active users with 99.95% uptime SLA
- Architected and deployed highly available, fault-tolerant Azure infrastructure using Virtual Networks (VNets), Application Load Balancers (ALB), Auto Scaling Groups, and geo-redundancy to minimize production outages
- Designed and implemented enterprise-grade CI/CD pipelines using Azure DevOps and Maven, enabling zero/low-downtime deployments and increasing release frequency from monthly to weekly cycles

- Led Infrastructure as Code (IaC) initiative using Terraform and Azure CloudFormation, automating 90%+ of infrastructure provisioning and reducing configuration drift and manual errors
- Built and managed containerized application platforms using Docker and Kubernetes (AKS), implementing resource limits and auto-scaling to dynamically handle traffic spikes
- Implemented centralized monitoring, logging, and alerting infrastructure using Grafana, Prometheus, and Azure Monitor, enabling proactive incident detection and reducing MTTR by ~50%
- Owned cloud security and governance, implementing IAM least-privilege access, network security groups, encryption at rest and in transit, and audit logging to ensure compliance
- Drove Azure cost optimization initiatives including VM right-sizing, Auto Scaling fine-tuning, storage policies, and usage analysis, achieving 25-35% reduction in monthly Azure spend
- Served as primary escalation point for P1/P2 production incidents, conducting root cause analysis (RCA), post-incident reviews, and implementing preventive measures
- Mentored team of 5 engineers, conducted technical code/infrastructure reviews, defined operational standards, and collaborated with development teams to improve deployment success rates

Senior Technical Engineer

Quess Corp Solutions | January 2021 – March 2023

- Designed, implemented, and supported scalable Azure and on-premises infrastructure for enterprise web applications supporting 50,000+ concurrent users
- Built and maintained automated CI/CD pipelines for build, test, and deployment processes using Azure DevOps and Jenkins, reducing deployment time by 40%
- Managed Docker containers and Kubernetes clusters supporting microservices workloads with multi-environment deployments (dev, staging, production)
- Implemented advanced release management strategies including blue-green deployments and canary releases for zero-downtime production updates
- Participated in on-call rotations supporting 24/7 business-critical production systems with guaranteed 4-hour response SLA
- Troubleshoot complex production issues across application, infrastructure, and networking layers, performing detailed root cause analysis and implementing permanent fixes

Senior Technical Engineer (L2)

UTC, Hyderabad | September 2019 – December 2020

- Provisioned, configured, and managed on-premises IIS servers supporting enterprise applications
- Designed and maintained secure on-premises network infrastructure including subnets, VPN connectivity, and VLANs

- Implemented and managed Intune policies across infrastructure ensuring security compliance and endpoint management

Desktop Engineer (L1)

Tech Mahindra, Hyderabad | March 2018 – August 2019

- Installed, configured, and maintained Windows servers across enterprise environment
- Monitored system performance, logs, and availability ensuring 99%+ uptime
- Managed VMware-based virtualization environments supporting 100+ virtual machines
- Resolved 150+ incidents and change tickets per month with 100% SLA compliance

EDUCATION

Master of Technology – Engineering | AITS, Kadapa | 2016 | Distinction (89%)

Bachelor of Technology – Electrical and Electronics Engineering (EEE) | SVIST, Kadapa | 2013 | 73%

CERTIFICATIONS & ONGOING LEARNING

Microsoft Azure Fundamentals (AZ-900) – Certified

In Progress: Azure Administrator Associate (AZ-104), Azure Solutions Architect Expert (AZ-305)
